...2006...WESTERN WASHINGTON WEATHER YEAR IN REVIEW...

THE YEAR WAS HIGHLIGHTED BY ONE OF THE MOST SUNNY AND DRY SUMMERS EVER REMEMBERED SANDWICHED BY A WET JANUARY AND A STORMY WET AND EVENTFUL FALL. THERE WERE EIGHT DIRECT WEATHER-RELATED DEATHS IN WESTERN WASHINGTON...THE MOST FATALITIES SINCE 1997. THERE WERE ALSO NINE INDIRECT FATALITIES ALL ASSOCIATED WITH THE MID DECEMBER WIND STORM. WEATHER RELATED PROPERTY DAMAGES TOTALED ABOUT \$17.4 MILLION THROUGH OCTOBER. THE NOVEMBER AND DECEMBER TOTALS WERE NOT YET AVAILABLE AND WILL LIKELY BE QUITE SUBSTANTIAL.

THE YEAR BEGAN WITH ONE OF THE WETTEST JANUARYS EVER ON RECORD. SEATTLE RECORDED 27 STRAIGHT DAYS OF MEASURABLE PRECIPITATION. THE HEAVY AMOUNTS OF RAINFALL PRODUCED SOME FLOODING AND LANDSLIDES. THE WET JANUARY WAS FOLLOWED BY A STRONG WIND STORM IN EARLY FEBRUARY...KNOCKING POWER OUT TO 265000 CUSTOMERS AND CLOSED THE EVERGREEN POINT FLOATING BRIDGE FOR THE FIRST TIME IN SEVEN YEARS DUE TO HIGH WINDS.

THE SUMMER WAS ONE OF THE DRIEST AND SUNNIEST IN MEMORY...EXTENDING FROM MID JUNE THROUGH MID SEPTEMBER. THERE WERE TWO HEAT WAVES DURING THE SUMMER... THE FIRST ON JUNE 25 AND 26...AND THE NEXT FROM JULY 20-22. OLYMPIA HAD THEIR FOURTH WARMEST TEMPERATURE EVER RECORDED WITH 101 DEGREES ON JULY 21ST.

THEN THERE WAS THIS FALL AND THE NOVEMBER TO REMEMBER. THE MONTH BEGAN WITH COPIOUS AMOUNTS OF RAINFALL RESULTING IN WIDESPREAD MAJOR FLOODING AND SOME LANDSLIDES. TWELVE RIVERS REACHED ALL-TIME RECORD HIGH FLOOD CREST LEVELS. THE FLOODING WAS FOLLOWED BY A PAIR OF WIND STORMS THAT POUNDED THE NORTHERN PORTIONS OF WESTERN WASHINGTON KNOCKING DOWN HUNDREDS OF TREES ONTO ROADS ...POWER LINES AND HOMES FROM THE NORTH COAST TO WHATCOM COUNTY...AND DISRUPTING POWER TO OVER 120000 CUSTOMERS. THE MONTH FINISHED WITH A PERIOD OF COLD WEATHER AND LOWLAND SNOW. SOME NORTHERN LOCATIONS GOT MORE THAN A FOOT OF SNOW. AND TO TOP IT OFF...SEATTLE HAD THE MOST RAIN IN ONE MONTH EVER SINCE RECORDS BEGIN IN THE REGION IN 1891 WITH 15.63 INCHES AT SEATAC AIRPORT. NWS SEATTLE ALSO CRUSHED ITS ALL-TIME RECORD OF MEDIA INTERVIEWS WITH 714. IT WAS QUITE THE MONTH.

ALL OF THIS WAS FOLLOWED IN MID DECEMBER BY THE STRONGEST WIND STORM TO STRIKE THE PACIFIC NORTHWEST SINCE THE INAUGURATION DAY STORM OF 1993. WINDS OF UP TO 90 MPH ON THE COAST AND 70 MPH IN THE INTERIOR BLEW DOWN THOUSANDS OF TREES...KNOCKED POWER OUT TO

CLOSE TO 1.5 MILLION CUSTOMERS AND RESULTED IN FOUR DIRECT FATALITIES FROM FALLEN TREES AND ONE DROWNING IN A HOME. NINE OTHERS DIED AS A RESULT OF INDIRECT CAUSES FOLLOWING THE STORM...PRIMARILY FROM CARBON DIOXIDE POISONING FROM GAS GENERATORS OR GRILLS IN HOMES.

THE OTHER WEATHER-RELATED FATALITIES DURING THE YEAR INVOLVED A 5-YEAR OLD GIRL STRUCK BY A TREE LIMB NEAR LAKE WHATCOM DURING A BLUSTERY JANUARY DAY... AN AVALANCHE FATALITY ON MT BAKER IN APRIL AND TWO DROWNINGS ALONG THE COWLITZ RIVER DURING THE EARLY NOVEMBER FLOODS...THE FIRST FLOOD FATALITIES THIS CENTURY.

THERE WERE TWO BRIEF TORNADOES THIS YEAR...CLOSE TO THE STATES AVERAGE OF BETWEEN ONE AND TWO TORNADOES PER YEAR.

OTHER WEATHER HIGHLIGHTS INCLUDED:

- SEVERAL OTHER WIND STORMS OCCURRED DURING THE WINTER AND FALL KNOCKING OUT POWER TO THOUSANDS AND TOPPLING HUNDREDS OF TREES
- COASTAL FLOODING ALSO OCCURRED DURING THE EARLY FEBRUARY WIND STORM ALONG THE COAST AND NORTH INTERIOR COASTLINES.
- THE EARLY NOVEMBER FLOODS DAMAGED ROADS...TRAILS AND CAMPGROUNDS THROUGHOUT MUCH OF MT RAINIER NATIONAL PARK...CLOSING THE PART UNTIL FURTHER NOTICE.

FOR THE YEAR...TEMPERATURES IN WESTERN WASHINGTON FINISHED THE YEAR LESS THAN ONE DEGREE ABOVE AVERAGE...WHILE PRECIPITATION WILL FINISH ABOUT 5 TO 10 INCHES ABOVE AVERAGE PRIMARILY BECAUSE OF THE QUITE WET MONTHS OF JANUARY AND NOVEMBER.

WARM EL NINO CONDITIONS IN THE EASTERN PACIFIC OCEAN TROPICAL WATERS ARE EXPECTED TO STEER THE PACIFIC STORM TRACK SOUTH INTO CALIFORNIA BY THE END OF THE YEAR...QUITE TYPICAL FOR AN EL NINO EVENT.
